960-673-1717 | komal.sharma.v1@gmail.com | [linkedin.com/in/lakshmikomakal](https://www.linkedin.com/in/lakshmikomakal) | github.com/GKomal2606 | Bangalore, India

EDUCATION

Jain (Deemed-to-be University)

Bachelor of Technology in Computer Science Engineering (AI & Machine Learning)

Bengaluru, India

Expected: 2025

- National-level Finalist – Smart India Hackathon 2022, LPU Punjab (August 25-26, 2022)

TECHNICAL SKILLS

AI/ML: Large Language Models (LLMs), Vision-Language Models (VLMs), RAG Systems, Computer Vision, Prompt Engineering, Deep Learning, NLP, TensorFlow, Machine Learning Algorithms (Logistic Regression, SVM, Decision Trees, Random Forests, AdaBoost)

Programming: Python, R, JavaScript, SQL

Backend & APIs: FastAPI, Celery, REST APIs, Swagger/OpenAPI, Microservices

Data Science: Pandas, NumPy, Scikit-learn, Exploratory Data Analysis, Statistical Analysis, Feature Engineering, Model Evaluation

Databases & Visualization: MySQL, NoSQL, MongoDB, Matplotlib, Seaborn

Cloud & Tools: Microsoft Azure (AI-900 Certified), Git/GitHub, Automation 360, HTML, CSS

PROFESSIONAL EXPERIENCE

AI/ML Associate Intern

Present

Gloify

Bangalore, India

- Architected production-ready RAG system for Derivium banking project enabling intelligent document retrieval through natural language queries and document number lookups, improving employee productivity
- Engineered FastAPI microservices with Swagger documentation for Quicklens project, implementing RESTful endpoints with optimized performance and comprehensive error handling
- Developed Library Management System using FastAPI and Celery for async task processing with CRUD operations and authentication; repo: github.com/GKomal2606/FastAPI-Library-Management
- Conducted extensive R&D in intelligent automation solutions across business processes
- Completed Automation 360 Developer certification demonstrating enterprise automation proficiency

AI/ML Intern

2023 – 2024

Chitragupta Urban Tech

Bangalore, India

- Implemented AI solutions leveraging Vision-Language Models and Large Language Models for urban technology applications
- Applied advanced prompt engineering techniques optimizing ML model performance across diverse use cases
- Contributed to end-to-end ML pipeline development including dataset curation, preprocessing, model evaluation, and system design

RESEARCH & PUBLICATIONS

Early Detection of Alzheimer's Disease Using Machine Learning Models

May 2024

- Published in IRJMETS (Impact Factor: 7.868), DOI: 10.56726/IRJMETS55566
- Conducted R&D analyzing OASIS dataset with demographic, clinical, and neuroimaging data; implemented Logistic Regression, SVM, Decision Trees, Random Forests, and AdaBoost with k-fold cross-validation achieving high predictive accuracy

PROJECTS

Mobile Phone Detection for Two-Wheeler Riders | Computer Vision, VLMs, LLMs

2024

- Developed computer vision system using VLMs and LLMs for traffic safety; executed data collection with annotation and prompt-based optimization achieving improved detection accuracy

CineInsight: Movie Analytics Platform | Python, Pandas, EDA, Statistical Analysis

2024

- Performed exploratory data analysis on 1000+ movies using Pandas, Seaborn, and Matplotlib to extract actionable insights on genre trends, box office performance, and critical reception patterns

CERTIFICATIONS

Microsoft AI-900 (AI Fundamentals) | Microsoft Azure Fundamentals | Automation 360 Developer | Learning AI Through Visualization (Columbia+) | Python using AI Bootcamp (AI for Techies) | Generative AI Mastermind (Outskill) | Vibe Coding 101 (Replit) | Python Programming
